

AccuTank Quatro Configuration

BREWERY: _____

Date: _____

Number of Tanks to Control: system will be built to handle this many tanks, impossible to expand once installed	1	2	3	4
Power to Valves:	115VAC	24VDC (note DC only!)		

Temperature Sensor and Valve extension wires are pre-built by ControlTec in our shop to add the M12 connector that mates to M12's on the box. Specify below the length of wire to add on to our sensor and ball valve wires. If providing your own valves check "Using My Valve" and insert a total extension length needed in the box. *Please add a little extra length to be sure the cable assemblies are long enough!*

Tank 1

Temp Sensor Cable is **4ft** + _____ = _____
Additional Length Total Cable Length

Valve Cable is **15ft** + _____ = _____ **Using My Valve**
(CT Ball Valve) Additional Length Total Cable Length Length needed in feet

Tank 2

Temp sensor cable is **4ft** + _____ = _____
Additional Length Total Cable Length

Valve Cable is **15ft** + _____ = _____ **Using My Valve**
(CT Ball Valve) Additional Length Total Cable Length Length needed in feet

Tank 3

Temp sensor cable is **4ft** + _____ = _____
Additional Length Total Cable Length

Valve Cable is **15ft** + _____ = _____ **Using My Valve**
(CT Ball Valve) Additional Length Total Cable Length Length needed in feet

Tank 4

Temp sensor cable is **4ft** + _____ = _____
Additional Length Total Cable Length

Valve Cable is **15ft** + _____ = _____ **Using My Valve**
(CT Ball Valve) Additional Length Total Cable Length Length needed in feet
